Year 11 Foundation

REVISION PACK

Number 9

Name: _____

Class: _____

Number 9 · Percentages of amounts (Lesson 6.1)

Worked example: a percentage of an amount

Work out 35% of 240 KD.

Step 1	Find 10%	$240 \div 10 = 24$
Step 2	Find 30%	$3 \times 24 = 72$
Step 3	Find 5%	$24 \div 2 = 12$
Step 4	Answer: 30% + 5%	$72 + 12 = 84\ \text{KD}$

Practice: a percentage of an amount

1.1 Work out 15% of 80 KD.

1.2 Work out 65% of 360 KD.

1.3 Work out 12% of 650 KD.

1.4 Work out 25% of 180 KD.

1.5 Work out 5% of 340 KD.

1.6 Work out 75% of 96 KD.

Number 9 · Percentages of amounts (Lesson 6.1)

Worked example: writing one number as a percentage of another

In a test, Ali scores 42 marks out of 60. Write 42 out of 60 as a percentage.

Step 1	Make a fraction	$\frac{42}{60}$
Step 2	× 100 for a percentage	$\frac{42}{60} \times 100 = 70$
Step 3	Answer	70%

Practice: writing one number as a percentage of another

1.7 In a test, Reem scores 18 marks out of 25. Write 18 out of 25 as a percentage.

1.8 In a test, Omar scores 39 marks out of 60. Write 39 out of 60 as a percentage.

1.9 In a test, Noor scores 63 marks out of 84. Write 63 out of 84 as a percentage.

1.10 In a test, Bader scores 27 marks out of 30. Write 27 out of 30 as a percentage.

1.11 In a test, Maha scores 21 marks out of 35. Write 21 out of 35 as a percentage.

1.12 In a test, Fahad scores 56 marks out of 80. Write 56 out of 80 as a percentage.

Number 9 · Percentages of amounts (Lesson 6.1)

Worked example: a percentage of the rest

Ali earns 1000 KD a month. Ali saves 10% of it. Ali spends 20% of the rest on food. How much does Ali spend on food?

Step 1	Saves 10%	10% of $1000 = 100$
Step 2	The rest	$1000 - 100 = 900$
Step 3	20% of the rest	$0.2 \times 900 = 180$
Step 4	Answer	180 KD

Practice: a percentage of the rest

1.13 Mona earns 1000 KD a month. Mona saves 20% of it. Mona spends 30% of the rest on rent. How much does Mona spend on rent?

1.14 Omar earns 1500 KD a month. Omar saves 10% of it. Omar spends 40% of the rest on rent. How much does Omar spend on rent?

1.15 Dana earns 800 KD a month. Dana saves 25% of it. Dana spends 50% of the rest on food. How much does Dana spend on food?

1.16 Yousef earns 2000 KD a month. Yousef saves 20% of it. Yousef spends 25% of the rest on food. How much does Yousef spend on food?

1.17 Reem earns 1200 KD a month. Reem saves 25% of it. Reem spends 20% of the rest on rent. How much does Reem spend on rent?

1.18 Khalid earns 900 KD a month. Khalid saves 10% of it. Khalid spends 50% of the rest on food. How much does Khalid spend on food?

Number 9 · Percentage increase, decrease and profit (Lesson 6.2)

Worked example: increasing an amount

Increase 60 KD by 15%.

Step 1	Find 15%	$0.15 \times 60 = 9$
Step 2	Add it on	$60 + 9 = 69$
Step 3	Answer	$69\ \text{KD}$

Practice: increasing an amount

2.1 Increase 40 KD by 10%.

2.2 Increase 75 KD by 14%.

2.3 Increase 250 KD by 8%.

2.4 Increase 120 KD by 5%.

2.5 Increase 64 KD by 25%.

2.6 Increase 90 KD by 30%.

Number 9 · Percentage increase, decrease and profit (Lesson 6.2)

Worked example: decreasing an amount

A car is worth 5000 KD. Its value falls by 20%. Work out the new value of the car.

Step 1	Find 20%	$0.2 \times 5000 = 1000$
Step 2	Take it off	$5000 - 1000 = 4000$
Step 3	Answer	$4000\ \text{KD}$

Practice: decreasing an amount

2.7 A car is worth 3000 KD. Its value falls by 10%. Work out the new value of the car.

2.8 A car is worth 7200 KD. Its value falls by 15%. Work out the new value of the car.

2.9 A sofa costs 480 KD. In a sale the price is reduced by 25%. Work out the sale price.

2.10 A phone costs 350 KD. In a sale the price is reduced by 20%. Work out the sale price.

2.11 A car is worth 9000 KD. Its value falls by 5%. Work out the new value of the car.

2.12 A TV costs 640 KD. In a sale the price is reduced by 15%. Work out the sale price.

Number 9 · Percentage increase, decrease and profit (Lesson 6.2)

Worked example: percentage profit

A shop buys a lamp for 20 KD. It sells the lamp for 25 KD. Work out the percentage profit.

Step 1	Profit	$25 - 20 = 5$
Step 2	Divide by the cost	$5 \div 20 = 0.25$
Step 3	Multiply by 100	$0.25 \times 100 = 25$
Step 4	Answer	25%

Practice: percentage profit

2.13 A shop buys a hat for 50 KD. It sells it for 60 KD. Work out the percentage profit.

2.14 A shop buys a toy for 40 KD. It sells it for 46 KD. Work out the percentage profit.

2.15 A shop buys a chair for 80 KD. It sells it for 100 KD. Work out the percentage profit.

2.16 A shop buys a kettle for 60 KD. It sells it for 78 KD. Work out the percentage profit.

2.17 A shop buys a bike for 200 KD. It sells it for 220 KD. Work out the percentage profit.

2.18 A shop buys a book for 16 KD. It sells it for 20 KD. Work out the percentage profit.

Number 9 · Reverse percentages (Lesson 6.4)

Worked example: price before an increase

After a 10% increase, the price of a game is 66 KD. Work out the price before the increase.

Step 1	New price is 110%	$110\% = 66$
Step 2	110% = 66, so 1%: ÷ 110	$66 \div 110 = 0.6$
Step 3	100%: × 100	$0.6 \times 100 = 60$
Step 4	Answer	$60\ \text{KD}$

Practice: price before an increase

3.1 After a 20% increase, the price of a clock is 72 KD. Work out the price of the clock before the increase.

3.2 After a 10% increase, the price of a game is 55 KD. Work out the price before the increase.

3.3 After a 30% increase, the price of a bike is 130 KD. Work out the price before the increase.

3.4 After a 5% increase, the price of a fan is 84 KD. Work out the price before the increase.

3.5 After a 25% increase, the price of a heater is 150 KD. Work out the price before the increase.

3.6 After a 15% increase, the price of a lamp is 46 KD. Work out the price before the increase.

Number 9 · Reverse percentages (Lesson 6.4)

Worked example: price before a reduction

In a sale, all prices are reduced by 20%. The sale price of a coat is 48 KD. Work out the price before the sale.

Step 1	Sale price is 80%	$80\% = 48$
Step 2	80% = 48, so 1%: ÷ 80	$48 \div 80 = 0.6$
Step 3	100%: × 100	$0.6 \times 100 = 60$
Step 4	Answer	$60\ \text{KD}$

Practice: price before a reduction

3.7 In a sale, all prices are reduced by 25%. The sale price of a skirt is 36 KD. Work out the price of the skirt before the sale.

3.8 In a sale, all prices are reduced by 35%. The sale price of a jacket is 52 KD. Work out the price before the sale.

3.9 In a sale, all prices are reduced by 10%. The sale price of a lamp is 63 KD. Work out the price before the sale.

3.10 In a sale, all prices are reduced by 10%. The sale price of a shirt is 45 KD. Work out the price before the sale.

3.11 In a sale, all prices are reduced by 20%. The sale price of a bag is 56 KD. Work out the price before the sale.

3.12 In a sale, all prices are reduced by 40%. The sale price of a table is 120 KD. Work out the price before the sale.
